

SONGER ELECTRICAL:

OUR SPARK POWERS YOUR PROJECT.

We provide our clients with full-service design, engineering, planning, and execution for all-size projects. No matter how complex or large the project, Songer's team of industrial and power-generating electrical engineers, veteran project managers, and Union Craftsmen have decades of precision experience successfully completing some of the most challenging projects.

WHAT WE BRING TO THE JOB:

- Electrical design, engineering, construction, and maintenance
- Interior and exterior lighting
- Installation of panels, disconnects, motor control centers, and transformers
- Power distribution systems
- Low voltage and fiber optic cable installation and testing
- Security system design and installation
- Fire alarm design and installation
- Instrumentation installation and calibration
- Variable frequency drive installation and programming
- Medium and high voltage electrical equipment and cable installation, testing, and termination
- UPS system design, installation, and testing
- Generators and automatic transfer switch installation
- Installation of solar power systems and wind turbines
- Infrared testing and thermal imaging
- Buried utility location service

SUPERIOR CAPABILITIES. RESULTS-DRIVEN.

With Songer, you get a partner that's always Ready to Go to Work for you. That's not lip service. It's a promise based on 50 years of in the trenches industrial contracting.

We work hard in a way that's transparent, with detailed planning always revealed, a meticulous approach to safety, with a commitment to deliver projects on or ahead of schedule.

SONGER. READY TO GO TO WORK.
